SOOTHING and POLISHING

ICC Soothing Oil has been formulated for dry and dehydrated cuticles. Thanks to the soothing action of the almond oil, the cuticles will be softer. Furthermore, the application of the oil upon the soak off nail polish, helps to maintain the brilliance.

How to use

After the application of the semi-permanent nail polish, it is good, from time to time, apply on every nail the Soothing Oil which conducts a soothing action and maintains the nail polish glossy and brilliant.

Features

- Easy application: with the brush, like a common nail polish, or with the dropper.

Key Ingredients

Wheat germ oil. Concentrate of nourishing and moisturizing factors it is rich in vitamin C, E, calcium beta-carotene and chlorophyll. It has a double moisturizing and nourishing action on the dry skin strengthening the hydro-lipidic film.

Argan Oil. This oil is used for its soothing, hydrating and strongly elasticizing properties. Stimulating the cell renewal, it has excellent antioxidant properties and it is frequently used in anti-age cosmetic products. The Argan Oil stimulates the intracellular oxygenation and it protects the connective tissues. Its application restores the hydro-lipidic skin layer and it increases the nourishment of the cells.

Vitamin E. It improves the surface of the skin conditions because it maintains the right levels of hydration. It has an anti-inflammatory action and it defends the skin against the aging process. It has an anti-oxidant function towards free radicals that are formed on the skin surface.
